Environmental Policy Statement

The Warnes Group and all subsidiaries are an environmentally aware business whose management acknowledges the impacts that its haulage and storage and associated operations may have on the environment as well as the public. The company's aim is to manage and reduce any negative environmental impacts caused by virtue of its business activities as well as to promote continuing improvements wherever practicable.

In order to support the aims of this policy the company is committed to:

- Ensure that any threat of pollution from the company's operations is identified and prevented.
- Minimising, wherever possible, the consumption of materials, fuel, energy and other non- renewable resources
- Eliminating excessive waste and implementing recycling where economically feasible
- Eliminating or minimising any potentially harmful effects of the company's activities on employees or the public
- Ensuring that all personnel fully understand their duty of care towards the environment and work according to the requirements of the management system.
- Complying with all environmental legislation and any other regulatory requirements

This policy and its objectives are met through the implementation and maintenance of an internal Environmental Management System.

The management system is reviewed periodically to ensure that it remains effective in meeting the requirements of this policy and other objectives.

This policy is communicated to all personnel working directly for or on behalf of The Warnes Group

Roger Warnes
Managing Director
